The tiger is a protected animal. Poachers can be jailed or fined if caught. However, the tiger trade is so profitable that the animal continues to be in danger.

The story of a tiger cub called Nicky caught public attention. Nicky was saved from the cooking pot by an animal lover. The Malaysian Trade Commissioner to Papua New Guinea learned that a tiger cub had been sold to a restaurant in Kuala Lumpur. He paid more than RM10,000 for the cub and gave it to the Malacca Zoo to keep. Mysteriously, the cub disappeared from the animal clinic where it was being kept for examination. For two days the public worried. Many people feared that the animal had been stolen. To the relief of the zoo staff and the concerned public, Nicky was found safe. She was playing near the tiger enclosure. Luckily, it had rained so at least there were puddles of water for her to drink. She was hungry but appeared none the worse for her adventure. Nicky could have wandered out when some employee carelessly left her enclosure unlocked. The other possibility was that someone had tried to steal her. When that person realized that the tiger is a protected species, Nicky was returned to the zoo.

Human beings are strange. The desire for exotic foods appears to be universal. People eat bears' paws, camel humps, duck embryos, ostrich and even crocodiles. The list appears endless. Nobody really seems to have strong objections. As a result, some animals look to be in grave danger of disappearing from the face of the earth.
